

THE AVALON HILL GAME COMPANY'S TRADEMARK FOR ITS DUNGEON ADVENTURE GAME

Rules Addendum

IBM® PC & PCjr. versions

The following are loading instructions and changes to the IBM version of **Telengard**.

Loading

After booting up the computer with your DOS disk, remove it and insert the game disk in the drive. Type TELEN and hit the ENTER key. The game will load and you will see the title screen.

Saving Characters

While all characters may be saved to disk, a dead character may only be recalled providing his name begins with **sv** (example: **svett**, **sveden**). Both letters must be lower-case (as opposed to SV or Sv), or the computer will erase them from the disk when they are recalled.
